

AnaCom's series of Rack-Mount up- and down-Converters have all of the familiar features of AnaCom's outdoor converters in a compact, rack-mountable form. Ideally suited for SCPC, MCPC, DAMA, TDMA, and VoIP applications and designed to interface with any L-band modem, these Rack-Mount Converters may be used in a wide variety of communication networks.

## Features

- ✓ Available in upconverter and downconverter configurations.
- ✓ Superior phase noise
- ✓ Flexible, universal power supply and converter (protected from 0 volts through 250 volts AC)
- ✓ Variable Gain Up-Converter
- ✓ Part of a family of products with significant commonality
- ✓ Internal 10 MHz reference
- ✓ Summary fault-status reporting including overheating, and converter failure. Robust 1+1 Redundant operation using AnaCom's Protection Switch.
- ✓ Built in test feature for improved maintainability and reduced dependence on external test equipment

## Built-In Test Facility

To improve and simplify maintenance routines, an external terminal (or computer) can be connected to monitor a number of critical parameters without use of additional test equipment. These include:

- ✓ Power supply voltages
- ✓ TX/RX synthesizer loop voltages
- ✓ Internal Temperature
- ✓ Alarm Details
- ✓ Onboard microprocessor for automatic temperature and aging compensation

## Benefits

- ✓ A family of products with significant commonality minimizes demands for spares and training
- ✓ These converters are designed for a minimum of maintenance. Periodic scheduled maintenance is required.
- ✓ Rack-mountable installation. (1U)

## Compact, Functional Design

The Rack-mount upconverter includes a 70/140 MHz to RF up-converter, and a universal power supply. The Rack-Mount downconverter includes a 70/140 MHz to L-band down-converter, and a universal power supply.

All of these are contained in a simple rack-mountable package, which provides excellent reliability in a wide range of functions.

## Flexible Applications
